

DATE : OCTOBER 29, 2020

TO : ALL CHERISH CARE STAFF & RESPITE PROVIDERS

FROM : CHERISH CARE MANAGEMENT

RE : COVID-19 PROTOCOL

As community spread of COVID-19 becomes apparent in many areas and as transmission from asymptomatic individuals was recognized, Cherish Care is sharing the advocacy with the CDC (Centers for Disease Control & Prevention) as part of the Prevention & Control Measures of the virus COVID-19.

Everyone should practice everyday preventive actions. As Respite Providers, it is part of your responsibility and you are thereby mandated to report/ inform the Cherish Care Management Office if you are feeling sick, experiencing any symptoms (such as fever, cough, or shortness of breath), or have tested positive with Covid-19. The following measures should be followed.

1. If you are sick, please avoid going to work.
2. Contact your healthcare provider for medical advice and to arrange for medical evaluation and testing if you have symptoms related to COVID19.
3. Inform the Cherish Care Management Office immediately and to give updates on test results and quarantine time.

Per CDC, an infected person can spread Covid-19 starting within the first 48 hours (or 2 days) before the person has any symptoms or tests positive.

By informing your clients and Cherish Care, you are helping to protect everyone so as not to compromise other critical infection prevention and control functions.

Kindly print your name and affix your signature and the date down below that you have received and understood this memorandum.
